

Quality and reliable fuel supply

Greenergy

Our mission

To deliver long-term value for our stakeholders through the production and distribution of waste-derived renewable transportation fuels.

We do this by:

- » **Delivering change through innovation:** developing and driving renewable projects
- » **Evolving our supply chain:** maintaining quality and reliable supply
- » **Retaining strong customer relationships:** honesty and transparency in how we work
- » **Acting responsibly and being accountable:** doing no harm to people or place.

What we do

We manage fuel supply chains from refinery gates to customer sites - importing, storing, blending and distributing fuel and managing stock levels for our customers.

As a leading European producer of waste-based biodiesel, Greenergy continues to invest in lower carbon fuels to support the energy transition.

Over
14bn
litres of fuel
sold in 2023

Over
1400
ship movements
managed per year

Over
800
deliveries managed
per day

Around
1 in 4
cars in the UK
supplied by
Greenergy fuel

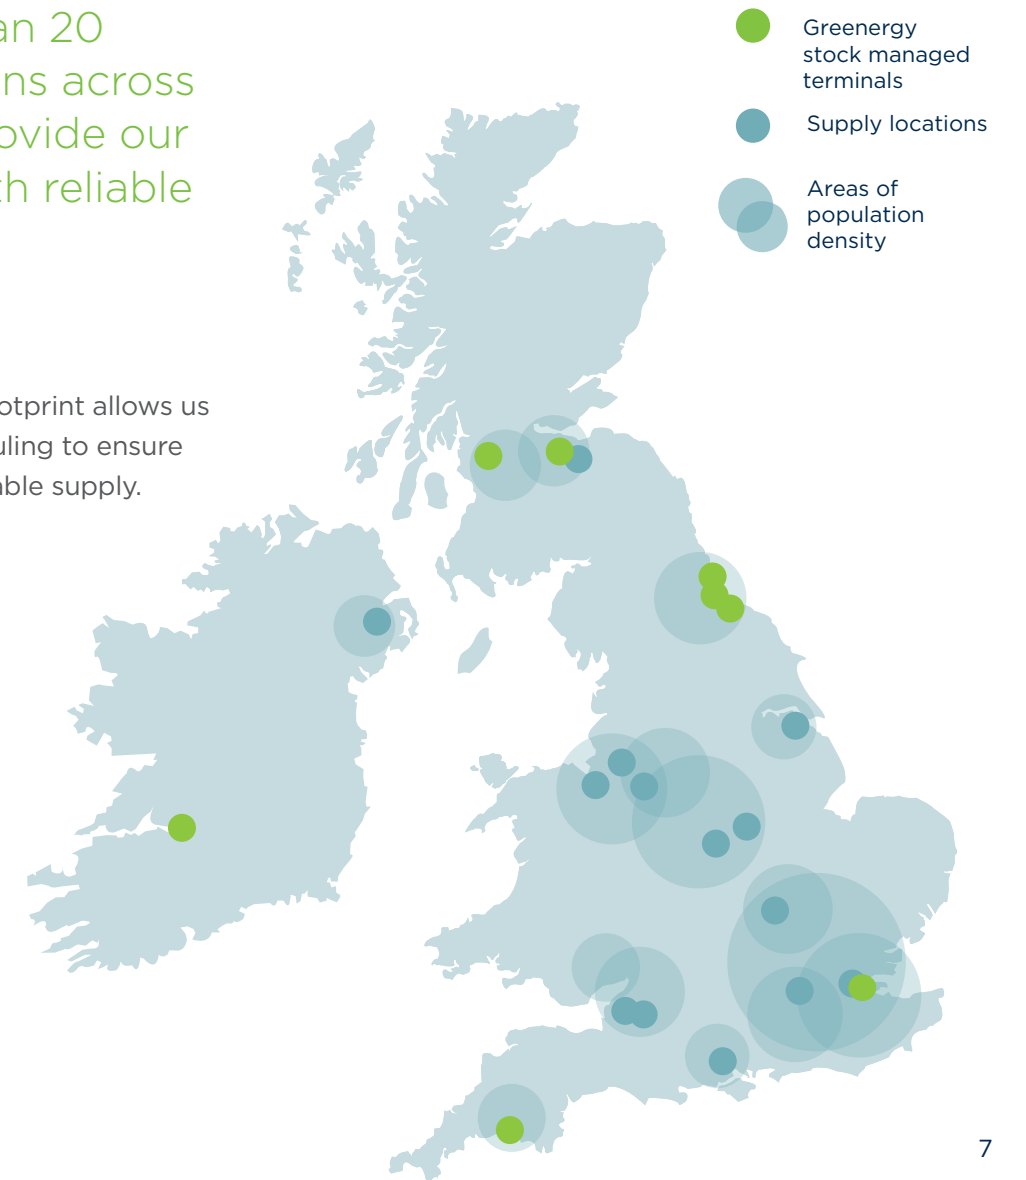

Unique supply capability

With more than 20 supply locations across the UK, we provide our customers with reliable fuel supply.

Supply resilience

Our national supply footprint allows us to optimise our scheduling to ensure cost-effective and reliable supply.

Greenergy Flexigrid

Our in-house haulage and logistics operation, Greenergy Flexigrid ('Flexigrid') provides customers with flexible haulage solutions. This includes, fuel with distribution or standalone distribution across both commercial and retail sectors.

The Flexigrid fleet is made up of over 200 tankers and over 600 drivers, operating from key locations nationwide to ensure supply resilience for our extensive customer network.

Flexigrid offers:

- » >96% of deliveries made on time within the delivery window
- » Resource capability at all key loading terminals
- » Customer services and scheduling support from our Manchester and Tamworth offices
- » Real time scheduling with automatic ETAs by email and text.

High bio blends

A low-cost way to reduce your emissions.

Greenergy's high bio blends range from B20 (average 20% biodiesel) to B100, displacing diesel and reducing transport emissions, when compared to standard grade diesel which is blended with up to 7% biodiesel.

Competitively priced, high bio blends are becoming increasingly popular with fuel retailers and fleet operators representing a good balance of cost savings and immediate emission reductions.

Our high bio blends are:

- » Significantly cheaper than hydrotreated vegetable oil (HVO)
- » Deliver immediate CO₂e savings
- » Readily available from dedicated loading tanks across the UK
- » Deliver the same performance as B7 diesel.

Using high bio blends in a commercial fleet

As part of Greenergy's own transition plans, our in-house haulier, Greenergy Flexigrid ('Flexigrid'), have introduced high bio blends, B20, across a portion of the fleet.

In addition to reducing emissions from our own fleet operations, we have been able to demonstrate in real world conditions the impact of switching a commercial fleet to a high bio blend.

Key findings:

- » An annual average 13% greenhouse gas emission improvement above standard B7 diesel
- » Across 16 tractor units, we saved 217 tonnes CO₂e in 2023 compared to using B7
- » Cost savings per litre of B20 compared to B7
- » No operational issues recorded
- » Positive response from drivers and stakeholders.

Following the success of B20 we are expanding our bunkering capability and the use of high bio blends across our Flexigrid fleet.

1.4m

miles driven by Flexigrid using B20 in 2023

Our offer

Reliable supply

We work to earn the long-term loyalty of each and every customer through supply resilience. Our priority is to ensure zero fault supply at all times.

We offer an extensive range of fuel products including petrol, diesel and higher percentage biodiesel blends, that can help support your decarbonisation strategy.

Dedicated support

Our dedicated and experienced commercial sales team offer complete account management including:

- » 24/7 customer care and logistics support
- » Tailored order and invoice solutions
- » Wetstock management
- » Weekly client market data reports
- » Monthly KPI reports.

To find out how we can best support your business needs, contact our Commercial Team today.
